International Versions of Lisa Software

```
======================================================================
```

International versions (beginning with release 2.0) of the Lisa Office
System differed from the U.S. versions only in the language used in
the alert boxes, menus, etc.

One version of the Workshop was available worldwide. For example, France
did not have a "French" vesion of the Workshop -- available to France was
the same English version distributed to all countries.
