LisaTerminal: Copy and Paste from LisaCalc

===

Before LisaTerminal can recieve LisaCalc Copy or Paste information in the
appropriate format (in columns), you need to set LisaTerminal's tabs to
reflect the width of each column you want LisaTerminal to send. When you don't
set the tabs, all of the information appears in one column with spaces between
each entry. To set tabs in LisaTerminal, follow the procedure on pages 46-48
in the LisaTerminal manual.
