LisaWrite: Information Outside the Printable Area

=====

When you print a LisaWrite document on 8.5 x 11 inch paper, avoid setting the right margin past 8 inches (or past 10 inches if you're printing in landscape mode). If you set the right margin beyond these limits, when you attempt to print the document you'll get a dialog box stating that "There is information outside the printable area".

If this message appears when the right margin is set to 8" or less, ignore it: simply click OK to proceed with the printing. If the problem persists, select "All of Document" from the Edit menu. Text located past the right margin will then become visible. After you cut that text, the document will print.
