Lisa Pascal: Typestyles

======================================================================

Here are the typestyles available to you from QuickDraw that are
not described in the manual:

  Font #0         system font
  Font #1         small icons and symbols
  Font #2         LisaDraw shading patterns
  Font #3         more icons and symbols
  Font #4         ps pitch, 12 point, sans serif
  Font #5         ps pitch, 18 point, sans serif
  Font #6         ps pitch, 24 point, sans serif
  Font #7         15 pitch, 9 point, sans serif
  Font #8         12 pitch, 12 point, sans serif
  Font #9         10 pitch, 12 point, sans serif
  Font #10        ps pitch, 12 point, serif
  Font #11        ps pitch, 18 point, serif
  Font #12        ps pitch, 24 point, serif
  Font #13        12 pitch, 12 point, serif
  Font #14        10 pitch, 12 point, serif
  Font #18        calculator symbols
  Font #19        20 pitch, unknown point, sans serif
  Font #20        LisaGraph tic marks
  Font #21        18 pitch, sans serif
  Font #22        large icons and symbols
  Font #49        LisaGuide icons and symbols

  * Pitch is the number of characters per inch; ps pitch is proportional
    spacing.
  * Point is the size of the characters (1 point = about 1/72 inch).
  * Serifs are the short decorative lines at the ends of strokes in classical
    typestyles.
  * Sans serif refers to typestyles without serifs.

Use the number of the font as the parameter of the TextFont procedure.  Font
numbers not listed comprise undefined characters.
