Super Serial Card: Detecting DSR (12/96)

===

Article Created: 15 November 1984
Article Reviewed/Updated: 16 December 1996

TOPIC ---

This article discusses how to detect if a printer has issued a DSR signal.

DISCUSSION ---

If you're writing a program that outputs to a printer and want to be able to
Peek into a location to detect whether the printer has issued a DSR signal, the
info you seek is on page 54 of the SSC manual. Checking location $C0E9 will give
the status of DSR as read from the ACIA status register. If using some non-Apple
card, check that card's manual.
