Lisa: Boot ROM Versions

=====

Many users have received notices telling them that they must upgrade to Rev. H CPU ROMs to run Pascal 3.0. THAT NOTICE WAS IN ERROR! Acceptable ROM versions include:

Lisa 2: D/A8 or H/A8
Lisa 2/10: F/88 or H/88

--The first (alphabet) character indicates the revision of the CPU ROM; the following two characters identify the I/O ROM.

Other CPU ROM versions, such as A, B, C, E and G, should definitely be upgraded. If a user insists on Rev. H CPU ROMs, or if you need to upgrade old CPU or I/O ROMs, order them from your Apple Regional Service Center. The part numbers are:

	CPU ROMs	I/O ROM
Lisa 2:	341-0175, 341-0176	341-0290
Lisa 2/10:	341-0175, 341-0176	341-0281

NOTE: The ROM versions are both stamped on the chip itself and displayed in the upper right corner of the Lisa's screen when you boot the system.
