Configuring the ImageWriter to the Apple IIc

======================================================================

Both Imagewriters are shipped with their switch settings configured to work on
the Apple IIc.

To work with the Apple IIc, the Imagewriter's switch settings should be:

    SW1: 8 7 6 5 4 3 2 1
        | | | | |X|X| | |  CLOSED
        |X|X|X|X| | |X|X|  OPEN

    Switch 5 of SW1 may be open when the Imagewriter is shipped)

    SW2:        4 3 2 1
                | | |X|X|  CLOSED
                |X|X| | |  OPEN

    The position of SW2's switch 4 doesn't matter, since it's unused.
