Installing Word Juggler version 2.9 on Catalyst 2.1

===

Due to a new format in the QUARK.INSTALL file present within Word Juggler 2.9
it is necessary to use MISCELANEOUS MANUFACTURERS option within the Catalyst
Editor to sucessfully install it instead of using the Quark option. Using this
procedure forces Catalyst to use the new QUARK.INSTALL instead of the one built
into Catalyst 2.1.

Procedure:

Boot Catalyst 2.1
Select Catalyst Editor
Select Install Program
Select Misceleneous Manufacturers
Put the Word Juggler 2.9 disk in the drive
Follow instructions on the screen.
