TOPIC -----

What cable do I use to connect my Macintosh II to a Hayes external modem?  
Can you give me information on how to build my own?

DISCUSSION -----

An Apple-manufactured cable, part number A9C0314, connects a Macintosh Plus, Macintosh SE, or Macintosh II to any Hayes external modem. This cable also works with most Hayes-compatible external modems. The cable is listed on product sheets as the Apple II Printer - 8 Cable.

You can also build your own cable with these pin connections:

Mini Din-8 Male	DB-25 Male
-----	-----
1 HSK	20 DTR
3 TXD -	2 RXD
4 GND	7 GND
5 RXD -	3 TXD
