LaserWriter: Page counter is for maintenance only

=====

This article last reviewed: 10 March 1986

You can't reset the LaserWriter's page counter because it is part of the printer's firmware.

Use the page counter to determine:

1. when to change the toner cartridge (approximately 2,500 pages)
or
2. when to have routine service performed (approximately 100,000 pages).
