Extended 80-Column Text Card: Sample Program Error (11/96)

=======================================================================

Article Created: 03 March 1986
Article Change History: 14 November 1996

TOPIC -----------------------------------------------------------

There is an error in the example program on Page 45 of the Extended 80-Column
Text card manual.

DISCUSSION ------------------------------------------------------

The manual reads:

    1000 PI = 3.14159265: P2 = PI 2
    1010 SP = P2 9: REM
    1020 EP = SP 5: REM
    1030 DT = PI 15:REM

The arithmetic operands are missing.

The lines should read:

    1000 PI = 3.14159265: P2 = PI * 2
    1010 SP = P2/9: REM
    1020 EP = SP/5: REM
    1030 DT = PI/15: REM
