Multiplan: Beware when loading files from a nearly full disk

=====

This article last reviewed: 21 April 1986

In Multiplan 1.02, 1.01 and 1.0, if you load a file from a nearly full disk and add enough that it will not fit on the disk, you will get a disk full message when you try to save. You will also lose the original copy on the disk.

What plan does during saving is first erase the old copy, then tries to save the new version. Just use "Save As ..." and save to another disk before quitting. Otherwise you will lose both copies of the file.
