Apple Writer versions 2.0 and 2.1: Differences from IIe version

==

After Apple Writer for the IIe, Apple Writer versions 2.0 and 2.1 were released
with the following additional features:

- ProDOS Operating System, which implies support for all ProDOS-supported
  storage devices.

- Terminal mode, which allows the user to connect the keyboard to a modem
  for telephone communications and sending and receiving files from remote
  computers/information services.

- fixes to miscellaneous problems

- a new, improved manual set
