AppleWorks: Using it with the IIe and the Epson DX-20 printer

===

This article describes how to run AppleWorks on a IIe with an Epson DX-20 printer.

Configuration:

```
  --Apple IIe
  --Super Serial Card
  --CompuCable, P/N MTB0201
  --Epson DX-20 Letter Quality Printer
  --AppleWorks, version 1.3
```

Super Serial Card switch settings:

```
  SW 1-1: OFF      SW 2-1: ON
  SW 1-2: ON       SW 2-2: OFF
  SW 1-3: ON       SW 2-3: OFF
  SW 1-4: ON       SW 2-4: OFF
  SW 1-5: ON       SW 2-5: ON
  SW 1-6: ON       SW 2-6: OFF
  SW 1-7: ON       SW 2-7: OFF
```

DX-20 switch settings:

```
  SW 1-1: OFF      SW 2: all OFF
  SW 1-2: OFF
  SW 1-3: ON
  SW 1-4: OFF
  SW 1-5: OFF
  SW 1-6: ON
  SW 1-7: OFF
  SW 1-8: OFF
```

AppleWorks configuration:

```
  Needs line feed after each return:  NO
  Accepts top-of-page commands:       NO
```

```
    Stop at end of each page:            YES or NO (NO is preferable)
    Platen width:                        13.0
    Printer codes:
      Characters per inch: no codes
      Lines per inch: no codes
    Boldface, subscript and superscript:
      Boldface begin:       ESC-W
      Boldface end:         ESC-&
      Subscript begin:      ESC-U
      Subscript end:        ESC-D
      Superscript begin:    ESC-D
      Superscript end:      ESC-U
    Underlining (printer has start/stop underlining commands):
      Underlining begin:    ESC-E
      Underlining end:      ESC-R
```
