AppleShare PC 1.1: Problems With 3rd-Party PC LocalTalk Cards

==

This article last reviewed: 9 November 1988

AppleShare PC 1.1, released in May 1988, is not designed to work with
third-party PC LocalTalk cards (such as the Daystar Digital's MicroChannel
LocalTalk card, Hercules Video/AppleTalk card, TOPs, Flash LocalTalk) because
the current protocol stack writes directly to Apple's LocalTalk PC Card.
