Inter•Poll: Requires System 6.0.2 For The Macintosh IIx

======================================================================

This article last reviewed: 20 January 1989

When using Inter•Poll with the Macintosh IIx, you may find the system
displaying this dialog error condition: "Inter•Poll requires 128K ROMs".

This error message is displayed only when using System Software 6.0 on a
Macintosh IIx. The problem does not appear when using System Software 6.0.2,
which is the recommended System Software version for the Macintosh IIx.
