Apple IIc Plus: Third-Party Add-On Products

===

This article last reviewed: 4 April 1989

This article lists four third-party products for the Apple IIc Plus.

RGB Video Adapter

An RGB video adapter called the "PEACOCK", Model CM2C (RGB Module for the
Apple IIc) from Telemax can support both analog and digital RGB. Therefore,
let Telemax know what monitor you plan to use when you order the Peacock
video adapter.

Internal 2400 Baud Modem

An internal 2400 baud modem, available from MDIdeas, is called CommLink IIc
Plus. The modem uses an internal connector.

Hard Disk (20MB)

Chinook Technology has a 20Mb hard drive (the CT-20c) that works with the
Apple IIc and Apple IIc Plus computers. The drive connects to the disk port
on the Apple IIc or Apple IIc Plus.

Memory Expansion Card

A memory expansion card is available from Applied Engineering. The card
uses the memory expansion port inside of the computer. The card can add
1MB of memory to the Apple IIc or Apple IIc Plus.
