A/UX: How to Use the "daiw" Command

=====

Article Created: 6 April 1989

Article Change History

08/31/92 - REVIEWED

- For technical accuracy.

TOPIC -----

If you have had problems piping to and from "daiw", consider the following command string.

DISCUSSION -----

It sends the file "args.1" to the ImageWriter II (directly connected to A/UX tty1) without any problem:

```
troff -man -Tiw args.1 | daiw | lp
```

The key point is that you must specify the "-Tiw" option in the "troff" command, so that the output of "troff" can be recognized by the "daiw" command. This assumes that ImageWriter II is the default system printer.
