TOPIC --

My copy of Responder 1.0.1 issues a dialog box with the following message:

  No Workstation Name Registered. Be sure to install Responder INIT
  in the System Folder.

If you click OK, Inter•Poll continues, and the workstation appears with the
correct names.

DISCUSSION --

Responder was updated to version 1.0.1 to fix a problem Inter•Poll had
identifying the Macintosh IIx. (The Installer for System Software 6.0.3
automatically installs Responder 1.0.1.) When you use this version with
the older Inter•Poll 1.0, the problem appears. The fix is to use
Inter•Poll 1.0.1 with Responder 1.0.1. Also note that this is not the
current version of Responder. Version 2.0.x is available as of this review.
