MacAPPC and MPW 3.0: Compatibility Issues

==

This article last reviewed: 1 August 1989

TOPIC -------------------------------------

This article discusses the compatibility of various versions of MacApp and MPW.

DISCUSSION ------------------------------------

MacApp 1.1.1 programmers should use MPW 2.0.2. Apple does NOT support developing with MacApp 1.1.1 under MPW 3.0.

MacApp 2.0b5 was designed for use under MPW 2.0.2. It is possible to tweak MacApp 2.0b5 to run with MPW 3.0, but this is also an UNSUPPORTED solution.

MacApp 2.0b9 does NOT support MPW 2.0.2, but DOES support MPW 3.0.
