AppleShare PC 1.2: MS-DOS 4.0 Incompatibility

=====

This article last reviewed: 28 August 1989

TOPIC -----

My AppleShare PC 1.2 does not run with MS-DOS version 4.0. Is there something I can do?

DISCUSSION -----

The best thing to do is upgrade; AppleShare PC 2.0 is fully compatible with MS-DOS 4.0. AppleShare PC through 1.2 is not compatible with MS-DOS 4.0.
