Macintosh-to-Compugraphic 9600 Connectivity

=====================================================================

This article last reviewed: 11 October 1989

TOPIC ------------------------------------------------

I want to buy a Compugraphic 9600.  Can I send output from the Macintosh to the
Compugraphic?

DISCUSSION ----------------------------------------

Agfa Compugraphic sells an Adobe PostScript RIP for the Compugraphic 9600. The
RIP (Raster Image Processor) comes with the necessary driver software for the
Macintosh and requires no modification of files. For more details, search the
Tech Info Library under "Agfa Compugraphic
