EtherPort II 2.5: Compatible with AppleTalk Phase 2

=====

Article Created: 25 November 1989
Article Last Reviewed: 25 June 1992
Article Last Updated:

TOPIC -----

Will the Kinetics EtherPort II card work in a Macintosh II running the AppleTalk Internet Router? If yes, what release of the drivers is required?

DISCUSSION -----

Yes, the Kinetics EtherPort II card does work in a Macintosh II running the AppleTalk Internet Router.

Version 2.5 of the EtherPort II software, which is AppleTalk Phase 2-compatible, is required.

The EtherPort II cards are now supported by Dayna Communications; for more information, search under "Dayna".
