CD-ROM: Premastering Equipment

=====

This article last reviewed: 15 January 1990

TOPIC -----

Is there any A/UX-based software that does premastering of CD-ROMs?

DISCUSSION -----

As of October, 1989, two companies produce CD-ROM premastering equipment and software for Macintosh computers. These are Meridian Data, Inc. and Optical Media International. As of that date, they do not support A/UX. However, we recommend that you contact them for information about their future plans. For more details, search the Technical Info library under "Meridian Data" and "Optical Media International".
