LaserWriter: Laser Specifications

=====

This article last reviewed: 13 March 1990

TOPIC -----

I need information about the laser used in the LaserWriter family of printers. I am being asked to identify this information for safety reasons:

- Laser Type
- Class
- Power
- Wavelength

Can you help?

DISCUSSION -----

The LaserWriter uses a semiconductor laser that meets the Bureau of Radiation Hazards class I specifications. Its wavelength falls between 750 and 850nm (nanometers) and is rated at 5mW (milliwatts).
