LocalTalk or PhoneNET: Cable Tester

======================================================================

This article last reviewed: 11 June 1990

TOPIC -------------------------------------------------------------

Do you have a recommendation for a LocalTalk circuit tester?

DISCUSSION --------------------------------------------------------

We found this article in the Redgate Buyer's Guide Library on AppleLink:

"The AT-Tester is a LocalTalk network cable tester that can test both LocalTalk
cables (Mini DIN 3) or PhoneNET cables (RJ-11).

"A user can ensure total circuit integrity in Mini DIN 3 cables by plugging the
cable into the power unit and plugging the remote end to the test unit.  The
tester will then show a user what the problem is.  The telephone cable is
tested the same way, but using the RJ-11 ports mounted beside the Mini DIN 3
port on either side of the unit."
