A/UX 2.0: Virus Protection (6/93)

==

Article Created: 16 July 1990
Article Reviewed/Updated: 15 June 1993

TOPIC ---

What do you recommend for virus protection in the mixed A/UX-and-Macintosh
OS environment?

DISCUSSION --

We haven't heard of any virus reports on A/UX machines. Most anti-virus
programs like "Disinfectant" or "SAM" should run under A/UX. Just check
the product you plan to buy to make sure it works in the A/UX environment.
