Hayes V 9600: Macintosh Pinouts

========================================================================

This article last reviewed: 31 August 1990

TOPIC -------------------------------------------------------------

Can you give me the pinouts for connecting the Hayes V series 9600 baud modems
to the Macintosh with a DIN 8 serial port.

DISCUSSION --------------------------------------------------------

Here are the pinouts for connecting the Hayes V series 9600 baud modems to the
Macintosh with a DIN 8 serial port.  They are direct from Hayes so they should
be correct.

Hayes 9600 V        Macintosh
1-7                 4-8
2                   3
3                   5
5                   2
4                   1
