Security: Everyone

A/UX: "/etc/newunix: /etc/uninstall.d/ae6: not found" Error

=====

Article Created: 11 October 1990

Article Change History

08/31/92 - REVIEWED

- For technical accuracy.

TOPIC -----

I got the error: "/etc/newunix: /etc/uninstall.d/ae6: not found".

DISCUSSION -----

Enter the command: `ls /usr/uninstall.d/ae6`

The output should be: `/etc/uninstall.d/ae6`

If it isn't, then the directory is missing. Re-create the directory and replace the files from your system backups.

- 1) Enter the command: `mkdir /etc/uninstall.d`
- 2) Enter the command: `chmod 755 /etc/uninstall.d`
- 3) Enter the command: `chown bin /etc/uninstall.d`
- 4) Enter the command: `chgrp bin /etc/uninstall.d`
- 5) Replace the files from your system backups or A/UX distribution disk.
