MacDFT: To Print Screen, Turn Background Printing Off

===

This article last reviewed: 30 November 1990

TOPIC ---

I am having problems printing screens with MacDFT 1.1. No matter what I do,
the "Print Screen" option remains dimmed.

DISCUSSION --

To work around a bug in the Print Monitor, MacDFT does not allow "Print Screen"
to be selected when background printing is on. To print screens with MacDFT,
turn background printing off.
