TOPIC -----

I'd like to know what RFCs and MIL-STDs MacTCP follows.

DISCUSSION -----

MacTCP is a complete implementation of the TCP/IP protocol suite and is fully compliant with the appropriate MIL-STDs (1777 and 1778) and RFCs (768, 791, 792, 793, 826, 894, 950, 1034, and 1035) and comprises TCP, UDP, IP, ICMP, DNR and for broadcast networks, ARP. The product will operate with gateways that comply with RFC 1009.
