•	To add information about "cannot display all items" message.
TOPIC	
How can I do a	Find with multiple criteria?
DISCUSSION	
Do this throug	h the "Find" dialog in the Finder:
1) Click on th	e "More Options" button.
2) Select the	first criterion you want to search and check "all at once".
3) Click the F	ind button.
 After all t selected, o select "Sea 	he files meeting the first criterion are found and choose "Find, More Options", enter the second criteria, and arch: the selected items".
5) Click the F	ind button.
Only those ite this procedure	ems that meet both criteria remain selected. You can repeat to narrow the search as much as you need.
If you get a m displayed at c	nessage that not all items meeting the criteria could be nnce, the most likely reason is that some items are at the

desktop level and could not be displayed in the window. Try moving those

..TIL06833-System_7-How_to_Find_with_Multiple_Criteria_(TA45261).pdf

items from the desktop into the root level window of the volume. The other possible reason for the message is that you have run out of memory due to too large a search result. Try quitting any open applications to free up more memory.
