System 7: Includes Bitmap Versions of TrueType Fonts

======================================================================

Article Created: 6 March 1991

Article Last Updated:

TOPIC -----------------------------------------------------------

Do I need Bitmap versions of TrueType fonts?

DISCUSSION ------------------------------------------------------

No. However, System 7 ships with the same component of bitmap fonts as
System 6.  This is to ensure that documents do not change line endings when
moved from System 6 to System 7. This is the only reason that bitmap fonts
are included.
