TOPIC ---

Does A/UX 2.0.1 support the function keys in the CommandShell?

DISCUSSION ---

Yes, A/UX 2.0.1 supports the Apple Extended Keyboard function keys in both
the CommandShell environment and console emulator mode. In addition, A/UX
2.0.1 supports VT100 application keypad mode in the CommandShell
environment, but not, however, in console emulator mode.

The console(7) manual pages provide more information on this subject.
