Apple PC 5.25 Drive: Compatibility with Macintosh Computers

=====

Article Created: 15 April 1991  
Article Last Reviewed: 19 June 1992  
Article Last Updated: 22 August 1991

TOPIC -----

Which Macintosh computers support the Apple PC 5.25 Drive?

DISCUSSION -----

The Apple PC 5.25 drive is supported only by the Macintosh SE and the Macintosh II, systems that were introduced without the Apple SuperDrive (formerly Apple FDHD).

Later versions of Macintosh computers have the Apple SuperDrive, which supports 3.5-inch MS-DOS diskettes--eliminating the need for the Apple PC 5.25 drive.

For customers who need to use 5.25-inch MS-DOS diskettes, we suggest looking at third-party products, such as those made by Dayna Communications.

To locate a vendor's address and phone numbers, use the vendor name as a search string.
