Macintosh: How To Get Two Screen Dumps on a Single Page

======================================================================

Article Created: 29 April 1991
Article Last Reviewed:
Article Last Updated:

TOPIC -------------------------------------------------------------

Is there any way to get a Macintosh to do two screen prints on a single
page?

DISCUSSION --------------------------------------------------------

There is no way to automatically get two screen prints on the same page.
Because the screen dump is a MacPaint file, you can cut and paste the two
documents into one and print the resulting document.
