Article Last Updated:

TOPIC -----

Will the LaserWriter II envelope cassette (P/N M0141) work on the LaserWriter Plus?

DISCUSSION -----

No, the LaserWriter II envelope cassette tray does not work in a LaserWriter Plus.

The LaserWriter and LaserWriter Plus only supported printing envelopes one at a time through manual feed. (Check with companies like BDT who make sheet and envelope feeders for the LaserWriter. For contact information, search the Tech Info Library under "BDT".)
