MacX: TCP/IP and SLIP Support

=====

Article Created: 22 August 1991
Article Last Reviewed:
Article Last Updated:

TOPIC -----

Is there a product that will allow MacX to support TCP/IP and SLIP?

DISCUSSION -----

MacTCP (version 1.1) is capable of supporting alternate LAPs (Link Access Protocol) including token ring and SLIP (Serial Line Internet Protocol). However, a third party must develop the SLIP driver for Macintosh.
