Apple IIe Emulation via ][ In A Mac

======================================================================

Article Created: 13 August 1991
Article Last Reviewed:
Article Last Updated:

TOPIC ------------------------------------------------------------

Does the Apple IIe Card work in the Macintosh IIsi?  Is the Macintosh
LC the only computer available that runs Apple IIe software?

DISCUSSION -------------------------------------------------------

The Apple IIe Card is designed exclusively for the Macintosh LC.

There is an alternative for Apple IIe emulation in other Macintosh models.
The product is called "][ In A Mac".  Contact the vendor for compatibility
information.

More information is available in the Redgate Product Registry on AppleLink.
