System 7: Install MacTCP Tool in the Extensions Folder (7/94)

=====================================================================

Article Created: 20 August 1991
Article Reviewed/Updated: 22 July 1994

TOPIC -------------------------------------------------------------

Where is the MacTCP Tool installed under System 7?

DISCUSSION --------------------------------------------------------

 System Sofware 6.0.x    -->     Communications Folder
 System 7                -->     Extensions Folder

MacTCP Tool belongs in the Extensions Folder. MacTCP, the control panel device
(cdev), goes into the Control Panels folder. The file MacTCP DNR (Domain Name
Resolver) will be created by MacTCP and installed at the root level of your
System Folder.

Article Change History:
22 Jul 1994 - Corrected location information of MacTCP and MacTCP Tool.
22 September 1992 - Reviewed for technical accuracy.
