TOPIC ---

I purchased KiwiEnvelopes 3.1.3 to be compatible with System 7. The
version 3.1.3 did not print properly to the LaserWriter IISC with the
Personal LaserWriter SC driver (Apple provides this driver for LaserWriter
IISC System 7 compatibility).

The Personal LaserWriter SC feeds envelopes from the side of the tray,
and the LaserWriter IISC feeds them from the center. Print on envelopes
was in the wrong location (shifted downward on the envelope).

How can I get proper printing on the LaserWriter IISC?

DISCUSSION --

There are two ways to modify KiwiEnvelopes 3.1.3 to remedy this:

• Throw Away "KiwiFile3".

  This causes the software to re-evaluate the printer in use and reset
  preferences. The software is now compatible with the LaserWriter IISC.
  However, you lose all names and addresses stored by KiwiEnvelopes.

• Use ResEdit to Remove the "PRTP" Resource from "KiwiFile3".
  Trashing this resource resets preferences, but retains names and
  addresses stored in the file.
