Apple Remote Access: Use AppleEvents at 9600 bps (11/94)

=====

Article Created: 5 November 1991
Article Reviewed/Updated: 28 November 1994

TOPIC -----

Can I use AppleEvents over an Apple Remote Access (ARA) connection?

DISCUSSION -----

Yes. Any AppleTalk based service should work fine. However, there may be time-out problems at low modem speeds. In the case of AppleEvents, the NBP time-out value is not long enough to handle speeds lower than 9600 bps.
