A/UX: Use "Minimum Macintosh" Install for Mac OS (9/94)

===

Article Created: 10 September 1991
Article Reviewed/Updated: 13 September 1994

TOPIC ---

I have the default 2MB Macintosh OS partition, and there isn't enough room
to install all necessary A/UX startup files and the bin folder.

DISCUSSION --

To have enough space in the Macintosh OS partition for the necessary A/UX
files, you must do a "Minimum Macintosh" install when installing system
software. There isn't enough room to install a standard System Folder and
the necessary A/UX files.
