A/UX: Supports One Macintosh Volume per Hard Drive (8/94)

Article Created: 11 September 1991  
Article Reviewed/Updated: 30 August 1994

TOPIC -----

I have four Macintosh volumes on an external drive, but A/UX recognizes only the first volume.

DISCUSSION -----

A/UX supports only a single Macintosh volume on a hard drive. If you have multiple volumes installed, A/UX recognizes only the first volume.
