Article Last Updated:

TOPIC -----

I am running DAL 1.2 on a VAX and my AppleTalk connections occasionally drop into a mutex state. When AppleTalk for VMS drops into this state, I can't make a connection to DAL.

DISCUSSION -----

This is a known problem with DAL and a patch is available on tape to fix the problem. To get a copy of the patch:

- Apple SEs should contact Tech Comm.
- Apple customers should contact the DRC.
