TOPIC -----

Using AppleShare 3.0 on a Quadra 900, I want to convert the Users & Groups file from a 2.0 server. Putting the old file in the new server's folder isn't sufficient. How can I get AppleShare 3.0 to recognize the old file?

DISCUSSION -----

We suggest you follow this procedure:

- 1) Move the Users & Groups file from the Preferences folder to the root level.
- 2) Put the old AppleShare 2.0 file inside the System Folder, but outside the Preferences folder.
- 3) Run the Admin program.
- 4) Enter a new password when the program prompts you for a new Administrator password.

That should convert the old file to the new format.
