Farallon StarController: Specifies One Node per Port

==========

Article Created: 17 February 1992

TOPIC -----

I have a Farallon PhoneNET StarController and a Farallon punch-down block. Can I punch down four nodes per channel on the punch-down block; that is, can I daisy-chain at the block instead of at the Macintosh end?

DISCUSSION -----

The Farallon StarController specifies one node per port. Exceeding this limit may cause network traffic and/or termination problems.

We suggest that you contact Farallon Technical Support for further information.
