LaserWriter IIf, IIg: Arbitrate Print Jobs Rather Than Buffering

======================================================================

Article Created: 23 March 1992
Article Last Reviewed:
Article Last Updated:

TOPIC -----------------------------------------------------------

Do the LaserWriter IIf and LaserWriter IIg buffer jobs waiting for the next
ports as part of the "all ports active" feature?

DISCUSSION ------------------------------------------------------

No.  Each job is arbitrated and takes over the printer while it's
printing.  Jobs on other ports have to wait for the jobs ahead to finish.
