TOPIC ---

Can I capture a Hewlett-Packard IIIsi printer using AppleShare Print Server
3.0? It looks like it should work as long as I have the right printer
driver installed on the server.

DISCUSSION --

We're not aware of any problems capturing third-party printers with
AppleShare 3.0. The process should be the same as capturing an Apple
LaserWriter.

For information on capturing printers, refer to the AppleShare Server 3.0
Administrator's Guide.
