Macintosh Quadra 900: Not Designed To Be Operated on Its Side

=====

Article Created: 31 March 1992  
Article Last Reviewed:  
Article Last Updated:

TOPIC -----

Can I operate the Macintosh Quadra 900 on its side and put a Macintosh 16" Color Display on top of it?

DISCUSSION -----

The Macintosh Quadra 900 is a tower design and is not intended to be operated on its side. Also, the case is not structurally designed to have weight placed on the panels. This may cause the case to crack.
